ABOUT THE PROJECT

GreenSkills4Deaf is an EU-funded project focused on empowering Deaf and Hard of Hearing (DHH) individuals with essential green skills, digital competencies, and environmental awareness. Traditional VET (Vocational Education and Training) resources often lack full accessibility for the Deaf community, creating barriers to sustainable career pathways and green entrepreneurship. To address this gap, the initiative has developed a fully accessible educational ecosystem—combining digital tools, tailored methodologies, and practical Living Hub workshops—to train both educators and DHH students, driving sustainability and social inclusion across Europe

The GreenSkills4Deaf project delivered four main resources:

- Living Hub Methodology for trainers
- VR Game to practice skills in real-world workplace scenarios
- Mobile App allowing students to design their own green business,
- an Online Platform featuring a comprehensive course on green competencies.

Co-funded by the European Union

Co-funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or Fundacja Rozwoju Systemu Edukacji. Neither the European Union nor the granting authority can be held responsible for them.

GREEN SKILLS 4 DEAF

THE PARTNERSHIP:

DISE DIGITAL INNOVATION SUSTAINABILITY HUB

ERGON a favore dei Sordi

CITIZENSACT

Polski Związek Głuchych Oddział Łódzki

SPOŁECZNA AKADEMIA NAUK

THE PARTNERSHIP

The project relies on close transnational collaboration to co-create and test all results across different countries:

- SAN (Poland) for academic excellence,
- Ergon (Italy) for direct experience with the Deaf community,
- CitizensACT (Cyprus) for active citizenship and sustainable development,
- CBE (Belgium) for strong links with SMEs and EU funding,
- and DISE LTD (Cyprus) for digital innovation and inclusive learning tools.

Through continuous collaboration, these organizations share local insights, adapt materials across different national contexts, and support one another to ensure the project outcomes meet high standards for inclusive green education.

FINAL STEPS

As the GreenSkills4Deaf project formally comes to an end this November, we look back at our key milestone events held last month in Warsaw. On October 20th, project partners gathered for the **Transnational Project Meeting** to review results and finalize the administrative closing steps, followed immediately by the **EU Final Conference** on October 21st, where we presented our developed tools for green skills education for Deaf and Hard of Hearing (DHH) individuals.

Currently, we are wrapping up the final Living Hub workshops for educators and DHH students to gather remaining feedback and conclude all project activities.
