November 2026

Project GreenSkills4Deaf Nears Completion: Empowering Deaf and Hard-of-Hearing Students in Green Entrepreneurship Across Europe

As project GreenSkills4Deaf approaches its final phase, concluding in November 2026, the international consortium announces the successful delivery of a comprehensive ecosystem designed to bridge the gap in green and digital skills for DHH VET students.

Key Project Deliverables:

- Sign Language Glossary for Green Terms: Developed comprehensive sign language glossary for green entrepreneurship concepts, complete with QR code integration to facilitate seamless access to visual terminology.
- e-GREEN ENTERPRISE Mobile Application: Launched a dedicated mobile app designed to guide DHH students step-by-step through the process of conceptualizing and building sustainable, eco-friendly businesses.
- VR Simulations: Created interactive VR scenarios and games that provide DHH students with safe, hands-on experience in solving practical green business challenges and mastering vocational skills.
- E-Learning Platform & Modular Course: Built an accessible online platform featuring modular courses, interactive tasks, and training materials that integrate green, entrepreneurial, and digital competencies.
- Validation via Micro-credentials: Implemented the European approach to micro-credentials, allowing DHH learners to certify and showcase their newly acquired skills to potential employers.
- Capacity Building for Educators: Delivered specialized guidelines and training materials for VET trainers, educators, and sign language interpreters to foster inclusive, modern teaching environments.

Looking Ahead

By combining immersive technologies with specialized pedagogical frameworks, GreenSkills4Deaf has established a scalable model for accessible vocational education. The project's digital tools, including the mobile app, VR simulations, and sign language resources, will remain fully operational and accessible to support educators and DHH students long after the project's official conclusion in November 2026.
