The GreenSkills4Deaf project aims to empower Deaf and Hard of Hearing (DHH) individuals within Vocational Education and Training (VET) to lead sustainable initiatives and create a community focused on environmental stewardship. By providing green entrepreneurial skills and innovative, accessible training programs, the project equips DHH students to tackle environmental challenges while fostering inclusion and creating pathways to meaningful employment in the green economy.

GREENSKILLS4DEAF

Promoting inclusion, digital innovation and green transition in VET through the acquisition of green entrepreneurial skills of DHH students for better skills match with the labour market.

Building Green Skills.

Promoting Inclusion.

Creating Opportunities

GreenSkills4Deaf is working to make the green transition more inclusive and accessible for Deaf and Hard-of-Hearing (DHH) learners.

Through cooperation between VET providers, DHH communities, educators and labour market representatives across Europe, we have transformed our project objectives into practical resources, learning opportunities and real-life experiences.

Our journey so far!

- **Mapped Green Opportunities**

We identified green initiatives, organisations and businesses across partner countries and brought them together through the GreenSkills4Deaf e-Mapping Tool.

- **Explored Green Workplaces**

DHH participants took part in on-the-spot visits to green enterprises, gaining first-hand insights into sustainable workplaces, green practices and skills.

- **Developed Accessible Learning Resources**

We created the accessible GreenSkills4Deaf Training Pack to strengthen the green and entrepreneurial competences of DHH learners and support VET educators.

- **Created Innovative Learning Experiences**

We combined digital and immersive learning approaches, including Virtual Reality, to make green skills learning more practical and engaging.

- **Put Our Results into Practice**

We are now implementing workshops with DHH learners and VET educators, allowing participants to explore, test and provide feedback on the project resources.

Together towards a greener and more inclusive future!

GreenSkills4Deaf demonstrates that the transition towards a greener economy must also be an inclusive transition.

By connecting DHH learners, VET educators, organisations and the labour market, we are helping create more accessible pathways to green skills, sustainable careers and active participation in Europe's green future.
